Website Recovery Service Endorsement

This endorsement modifies the attached Policy and shall be read as if incorporated within it:

BUK/822997

It is understood and agreed that the following service is added to the Policy:

Dos Technical Support Service

Set out below, are the arrangements that **We** have made for **Your** benefit with **DOSarrest Internet Security, Ltd** to provide the **DOS Technical Support Service** to remedy a slow down or failure of **Your** websites and computer system, caused by a **Denial of Service Attack**.

The **DOS Technical Supports Service** paid for by **Us** and provided by **DOSarrest Internet Security, Ltd** will only be available for **You** to take up, if **Your** professional indemnity policy is in force with **Us**.

A. Definitions for this section

- A.1 DOS Technical Support Service (“The Service”)** means the service provided by **DOSarrest Internet Security, LTD** and which consists in setting up a traffic filtering service, developing filtering rules, and hosting the filtering to re-establish **Your** normal flow through **Your** internet ports 443 and 80 following a **Denial of Service Attack**; ensuring **Your** business traffic is passed on seamlessly and without delay and, if requested and authorised in writing in advance by **Us**, continuing to offer hosted filtering services following the attack.
- A.2 DOSarrest Internet Security, LTD** means the company which specialises in providing denial of service protection services and with which **You** enter into a Service Level Agreement for the provision of the **DOS Technical Support Service**. More information on the company can be found at <http://www.dosarrest.com/>

B. What we do

We will pay, on **Your** behalf, to **DOSarrest Internet Security, LTD** the cost of the **DOS Technical Support Service** following a **Denial of Service Attack** which occurred and is notified during the **Policy Period**, subject to the terms, conditions, and limits stated below and without the application of any Policy excess.

C. Specific conditions to the service

C.1 How the DOS Technical Support Service is triggered

The Service is only available to **You** during the **Policy Period**, in circumstances where, during the **Policy Period**, **You**:

- public facing website (through port 80, associated with HTTP traffic); or
- secure public facing website (through port 443, associated with HTTPS traffic)

cannot respond to legitimate traffic, or responds so slowly as to be rendered essentially unavailable caused by a **Denial of Service Attack** occurring during the **Policy Period**.

C.2 What you must do

There are three steps that describe in a simple manner what **You** must do and how to get you back up and running again:

- a. **STEP 1** Notify a **Denial of Service Attack**.
- b. **STEP 2** Obtain a new IP address
- c. **STEP 3** Contact **DOSarrest Internet Security, Ltd**

a. STEP 1 - Notification of a Denial of Service Attack

You must notify **Us** as soon as possible and during the **Policy Period** of any **Denial of Service attack** which occurs during the **Policy Period**.

b. STEP 2 - Obtain a new IP address

Once you have notified the **Denial of Service Attack** as per the step above, **You** must obtain a new "clean" IP address (because the old one is being inundated), which **You** will need to give to **DOSarrest Internet Security, Ltd** ¹.

Notes: How do you obtain a new "clean" IP address?

- i. If **You** host **Your** own web server²
 - contact **Your** internet service provider to request another IP address and
 - install the IP address for the A record to the new IP address.

OR

- ii. If someone else hosts **Your** web server
 - contact the hoster to request a new IP address and ask them to install it.

c. STEP 3 - Contact DOSarrest Internet Security, Ltd and enter into a Service Level Agreement

Contact **DOSarrest Internet Security, Ltd** by completing a few details on the form located at the following web address: <http://www.dosarrest.com/ddos-emergency-contact> and they will quickly call **You** back.

In order for **DOSarrest Internet Security, Ltd** to respond quickly, please remember to specify:

- i. **Your** policy number; and
- ii. The date **Your** policy inceptioned,

You will be then required to enter into a SLA with **DOSarrest Internet Security, Ltd** for the provision of the **DOS Technical Support Service**.

DOSarrest Internet Security, Ltd will give **You** a DOSarrest IP address that you point the domain to, so **Your** traffic gets filtered, and only legitimate traffic is sent back to **Your** server.

¹ An IP address is like an identity on the internet. All computing devices connected to the internet have an IP address. You will need a new address in the event of a DoS attack.

² i.e. you do not have an external company that hosts **Your** website for you

C.3 What DOSarrest Internet Security Ltd will do and limits.

Once the above 3 Steps have been fulfilled, **DOSarrest Internet Security, LTD** will provide **The Service** and at **Your** request, continue to offer this filtering of **Your** traffic:

- i. for a period of up to 12 months for one IP address; or
- ii. for a period of 6 months for two IP addresses.

Any further request to use **The Service** provided by **DOSarrest Internet Security, LTD** will need to be paid by **You** during that **Policy Period**.

D. Additional details of the service

Further details of the terms and conditions that will apply to **The Service** can be obtained from **DOSarrest Internet Security, LTD** at sales@dosarrest.com.

E. FAQs

- **How do You triage a call from You to determine whether it is a Denial of Service Attack or something more mundane like an ISP cable cut? Is it quickly evident?**

It is usually evident by inspecting the traffic, the bandwidth, and performing network trace routes.

- **Why do I need an IP address from DOSarrest Internet Security, LTD if I have already obtained a new IP address?**

*The attacker is sending **You** unwanted traffic to slow down **Your** website and prevent **You** from receiving **Your** normal business traffic. By directing all **Your** traffic to the DOSarrest IP address it can be filtered before sending it on to you. Only **Your** normal business traffic is sent to **Your** new IP address, to allow you to continue to do business.*

- **If You have obtained a new IP address but You do not know whether You or the hoster originally set up the A record, what would you do?**

We do recommend having a technical contact like their systems admin or network admin to help the initial setup process. Non-technical customers may contact their ISP regarding any questions on A records and so on, or can set up a communication channel (like email) between DOSarrest and their ISP.

- **What if You change the ISP during the 12 months, do they need to give DOSarrest the new IP address?**

Yes, they would need to provide DOSarrest with the new IP address and the IP change is seamless if both servers are up at the same time. If not, we recommend making the switchover during lower traffic periods.

All other terms and conditions of this Policy remain unchanged.
